# **Notes on Commonly Used Glossary**

Note/Glossary	Definition
<u>Note 1</u> : Next phase of Development Project	Next phase of development project means that project leverages on successful networking models which was subsidized by CIIF. To avoid multiple counting in the CIIF database, grateful if project teams would indicate the number of persons who have participated in previous project clearly.
Note 2: Volunteers	Anyone who is willing to offer one's time and effort not for material returns, but for benefiting and improving the community, without restriction on service hours. (with reference to the definition of the Hong Kong Agency for Volunteer Service)
	(Project teams are requested to keep the name lists and service records of all volunteers, and also develop a clear system and guidelines on the nature and types of volunteer service; the recruitment, training and support of volunteers; registration and commendation systems; and the calculation method of service hours.)
<u>Note 3</u> : No. of Direct Participants	refers to the number of persons who have directly participated in project programmes, e.g. after school care for children, the elderly or families visited, etc. If the same participant takes part in several programmes of the Project, <b>please prevent multiple counting</b> when filling in the number of direct participants in "1.1 Gross Output", and fill the number of direct participants in "1.2 Individual Programme Output".
<u>Note 4</u> : No. of Indirect Participants	refer to persons who do not directly participate in the Project ( <b>should not</b> duplicate with the number of direct participants), e.g. visitors to the exhibitions or onlookers of the opening ceremony of the Project.
<u>Note 5</u> : Social Capital	According to the World Bank, research findings and the experience of CIIF funded-projects, social capital refers to the institutions, relationships and norms that shape the quality and quantity of a society's social interactions. Social capital includes social norms (personal attitudes and social values), networks and institutions.
	Specifically, funded projects should base on six core social capital dimensions, namely (1) social networks; (2) trust and solidarity; (3) mutual help and reciprocity; (4) social cohesion and inclusion; (5) social participation; and (6) information and communication, to foster community empowerment and promote social capital development.
	(with reference to the definition of the World Bank)
<u>Note 6</u> : House/Floor Captains	A House/Floor Captain is normally a Core Volunteer/Leader who understands the needs of the community with special roles and functions in respective building/public housing estate/private housing estate/ villages, including bridging residents, linking local people and fostering neighbourhood mutual support networking; is willing to provide timely support to neighbours in need; becomes the "resources base" for households and knows how to seek other supports in the community when necessary; and assists in identifying potential problems early in the community. They are generally recognised by the community as a leader. If any Core Volunteer/Leader who has the above functions but uses alternative title, e.g. "webmaster", please also report the outputs in the column.
<u>Note 7</u> : Role Transformation	Engaged in the Project, participants may undergo the transformation of identity and role, e.g. from participants to volunteers, ordinary volunteers to core volunteers, and learners to instructors, which will enhance their sense of self-empowerment and awareness of positive image.
<u>Note 8</u> :	Two or more family members, e.g. father and son, mother and daughter, grandmother and

Participating Families	grandchild, husband and wife, siblings, etc. participate in the Project.
<u>Note 9</u> : Key Collaborators	Collaborator(s) whose active role in project implementation can effectively mobilise resources and networks so as to enhance the strategy and outcomes of the Project. <b>One-off collaboration or purely providing support to the Project through provision of venue or assistance in promotion shall not be considered key collaborators.</b>
<u>Note 10</u> : Social Support Network	A network refers to the interactive relationship among people or bodies/organisations. Social networks are increasingly regarded as important sources of social capital and allow people to access social support. Interpersonal networks and interactive behaviours can foster greater cohesion and stronger collective actions. Resources can be deployed through the social support networks among people or teams to tackle problems of common concern and build up or enhance social capital. Networking can be achieved in many forms, including:
	Cross Generations: networks between different age groups, e.g. the youth and the elderly Cross Strata: social support networks between strata of different backgrounds and economic conditions, e.g. the middle class and the grassroots Cross Ethnicities: social support networks between different ethnicities, e.g. local Chinese and South-Asian ethnic minorities Cross Sectors: collaborative networks of more than one sector, e.g. the welfare sector and the business sector, schools and the medical sector Cross Organisations: networks of different organisations from the same sector, e.g. co-operation between two social welfare services organisations in the welfare sector
	In defining social support network, project teams should examine whether the above networks are developed steadily. One-off participation or collaborative relationship with an individual partner is not a network. For example, Company A co-organisaed communities carnivals with a project team for three times, this development is a collaborative relationship, and is not defined as a network.
Note 11: Co-operative Societies	Shall register and establish under the Co-operative Societies Ordinance (Cap. 33), please refer to <u>http://www.hklii.hk/hk/legis/ch/ord/33/</u> for details.
<u>Note 12</u> : Self-sustaining Organisations	Organised by persons with common goals or visions who aim to achieve the objectives of the organisation in concerted efforts, and its business and operation are managed by members.
<u>Note 13</u> : Social Enterprises	There is no common definition of SEs. According to the Commission on Poverty, the main features of distinguishing the social enterprise from the other, is a business which integrates a commercial approach and a social purpose. SEs should include the following key distinguishing features (pages 5-6 of Paper No. 7/2007, the Commission on Poverty):
	(a) Simultaneous pursuit of business and social objectives - SEs are characterised by the
	integration of commercial approaches and social purposes.
	(b) Engagement in business/trading activities - SEs should provide goods and services in
	return for income.
	(c) Not-for-profit - SEs should primarily be positioned to achieve social objectives instead of maximising profits.
<u>Note 14</u> : Sustainable development	We can refer to the six areas of social capital summarised by the World Bank and international academic research results, and implementation experience of funded projects when evaluating the sustainable development of a project. The six areas of social capital include (1) Social Network; (2) Trust and Solidarity; (3) Mutual Help and Reciprocity; (4)
