

**Play with Cross Generations in Lei Tung—TWGHs Jockey Club Lei Tung
Integrated Services Centre 0027-20**

Project Summary

“Play” is an amazing tool which can bring about happiness and foster relationship building amongst players and also acts as an education tool in people’s development and building up social capital. Through mobilizing participation of corporations, the project will form some “play teams”, organise fun fairs on a regular basis and set up toy bank to connect families and people across generations and background at Lei Tung Estate in Southern District. It is hoped that through “play and care”, the project is able to promote mutual understanding, reciprocity, trust and support in the community, making Hong Kong a caring society.
