

**Rainbow Community Support Network Platform –“Hook” away Sadness  
and “String” up the Warmth – Tin Shui Wai Women Association Limited**

Project Summary

This project draws on the experience and network results of the first phase to enhance the social capital outcomes in three aspects : social constructivism, social integration and mental health, adopting the “regional development” approach and extending social capital from Tin Ching Estate to Tin Yan Estate, assisting the hidden families and residents whose sense of belonging are relatively weak to integrate into the community, enhancing interaction and care among residents of the estates, improving residents’ sense of belonging and resilience. Furthermore, this project uses the “collaborative model” to promote “Home, Welfare, Community, School, Government, Business, Residents” collaboration for enhancing social capital and reciprocity, achieving synergy and creating miracles.
